

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

NOTICES FROM THE LICK OBSERVATORY.*

PREPARED BY MEMBERS OF THE STAFF.

NEW DOUBLE STARS.

The following double stars were found with the 12-inch equatorial of this Observatory in the course of my double-star work. As they are not contained in Burnham's very complete manuscript catalogue, they may safely be called new.

The star places are all for 1900.0.

^{*}Lick Astronomical Department of the University of California.

		AB and	C.		
1899.442	81°.0	2″•76	 14.5	3	36-inch.
.456	79 • 3	2.43	14.0	3	36
.459	77 • 9	2 .44	<u> 14.5</u>	3	36
1899.45	79°⋅4	2".54	 14.3		
		AB and	D.		
1899.451	o°.7	14".99	— 12. 0	3	12-inch.
.454	0.9	14 .97	<u> </u>	3	I 2
1899.45	o°.8	14".98	<u> </u>		
AB and E.					
1899.456	208°.0	27". 25	 14.5	3	36-inch.
.459	210.0	27 .31	- 14.5	3	36
1899.46	209°.0	27".28	- 14 5		

The wide pair, AD, was noted with the 12-inch, and A was suspected as a very close double with the same instrument. In verifying this with the 36-inch, the faint stars C and E were found. The stars AB and C form a very pretty triple with the large telescope.

R. A.
$$15^h 19^m 5^s$$
. Decl. — $4^\circ 45'$
 1899.459 $238^\circ.9$ $1''.41$ $8.5 - 13.5$ 3 36 -inch.

 $.473$ 239.7 1.51 -13.5 3 36
 $.475$ 236.2 1.37 -13.5 3 36
 1899.47 $238^\circ.3$ $1''.44$ $8.5 - 13.5$

The faint companion is barely visible with the 12-inch.

LL. 28131.

R. A.
$$15^{h} 21^{m} 22^{s}$$
 Decl. — $5^{\circ} 18'$
 1899.454 $146^{\circ}.3$ $0''.70$ $8.7 - 9.1$ 3 12 -inch.

 $.459$ 147.1 0.67 $8.5 - 9.2$ 3 36
 $.473$ 148.5 0.58 $8.5 - 9.0$ 3 36
 1899.46 $147^{\circ}.3$ $0''.65$ $8.6 - 9.1$

In the finder-field with the preceding star. Well separated with the 12-inch.

R. G. AITKEN.

July 10, 1899.
